

## Matchman Installation Instructions

1. Right click on the attached zipped file: *matchman07.zip*, then click **Save As**. Save this file in you're My Documents folder.
2. To extract all files/folders, right-click on the *matchman.zip* file that was saved in step 1, and then click **Extract All**. In the Compressed (zipped) Folders Extraction Wizard, specify: *My Document\matchman07 as the location* where you want to store the extracted files.
  - When you double click on folder MyDocuments\matchman07 you will now see two additional folders:
    - Package
    - Update File
  - Note: These folders are solely for the purpose of storing this version of Matchman – when the installation is complete it will actually operate from: *c:\program files\matchman*
3. Double click on folder *Update File* - you will see a copy of the users manual: *Matchman User's Manual.doc*.
  - Please read before proceeding
4. To install Matchman double click on folder *Package*. You will find a file: *setup* – double click on this file to install Matchman.
  - Note: Follow the instructions in the pop-up window – assume all default information – then click through the process.
5. Once Matchman installation is complete you can click: **Start, All Programs**, then **Matchman** to run the application.
  - Note: team files, bout sheets, reports, etc... can always be found in *c:\program files\matchman*. Using the MS/Office products: Word and Excel will allow you to open, print and/or edit all team and bout related files.
  - Please remember to read the users manual referenced in step 3.
